

Product Features

- No printable surface needed on disc
- Up to 10 discs a minute
- Compatible with various label materials
- Table-Top Unit
- Fully Transportable

The LAB120 Disc Labeller from JMV Robotique is a semi-automatic machine for labelling CD's and DVD's providing a printable surface prior to the printing and burning process. The Disc Labeller is compatible with various label materials including matte or glossy paper finishes and even transparent labels.

The Disc Labeller is simple and quick to use; place a disc on the open tray and press the button. The automatic drawer then moves into position and a label is placed on the disc with rollers to ensure a smooth finish every time. An optional extra is the FD120; disc labelling becomes fully automated as the robotic arms move blank discs from the hopper onto the LAB120 then to an empty spindle for completed discs.

The cost and time savings are enormous. Up to 10 discs can be labelled per minute manually and up to 1600 discs per hour with the FD120 add on, a fraction of the time taken to label discs by hand.

Specification

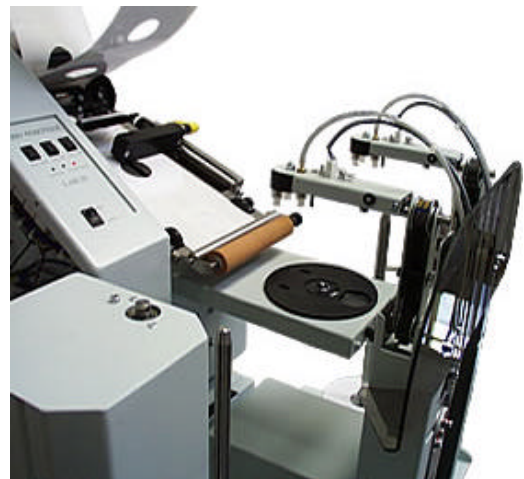

Media Compatibility:	CD/DVD's
Throughput :	10 per minute (typical)
Dimensions (WxHxD): Without feeder	24.5" x 26.5" x 44.0" (With drawer extended) 600mm x 673mm x 1118mm
Dimensions (WxHxD): With feeder	49.5" x 45.4 " x 55.4 " (with drawer extended) 1240mm x 1153mm x 1408mm
Operation Voltage:	110v to 240 volts 50Hz or 60Hz (self-adjusting)
Power Consumption:	100w (FD120 Feeder ~100w)

Label Specifications

Roll Size:	Up to 10" (254mm) Diameter
Roll Width:	5.3" (135mm) maximum
Hub Size:	3" (76mm)
Label Diameter:	Maximum 4.6" (118mm)

Options

FD120 Automated Feeder (right)

Warranty

12 months back to base, all parts and labor included.
Extended warranties also available.
